Vidya Sanskar Public School

An institution devoted to bring a better tomorrow

Affiliated with CBSE New Delhi 10+2

*"Service before self
is our motto"*

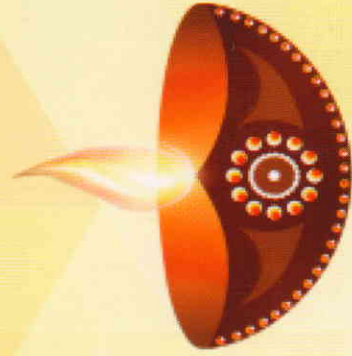

Late Smt. Gangotra Dwivedi

*The source of all pervading perennial
divine blessings*

Late Pt. Shredev Dwivedi

*The guardian angel of my achievement
in making.*

Chairman's Desk...

First of all I wish to share my immense pleasure with you all for the little plant that was sown few years back has started growing up, spreading its green leaves and young shoots. It has also started blooming and blossoming. In due course of time it will show its youthful vigour and characteristic. I am sure soon it will be a haven for thousands of birds. I bestow all the credit to you all. Had you not been concerned, it would have been withered at the root and there remained a sad dirge a dying dirge. Hats off!

Now what needs is to prune and trim, give it a space to grow with a continuous watch of a wise, diligent and expert gardener. Once again I bestow this work on you. You all are my guide, mentor and philosopher. Without your commendable comments my dream will never come true.

The school is growing. So are we. We are growing old and you all are growing young. We are growing to depart and you are growing to take part and participate. "Old order changeth yielding place to new" join us, come to us, be one of us so that we all can see the small plant of yesteryears laden with rich fruit of knowledge, sanskar and achievements. School is yours. Tomorrow is yours. Let it be yours only. Let it be "one remains many change and pass."

Thanks

Dr. N.P. Dwivedi (Chairman)

Director's pen...

Each child is special and has a hidden potential, the primary objective of education is to identify, register and channelise their energy into right direction in making them self reliant and innovatively productive individuals. One of the basic aims of education is to nurture in the learner a sound mind and strong value based character, but it deeply pains me that the existing education centres are far away from the true meaning of education & learning. We at VSPS are constantly trying to inspire the children to evoke and embrace new age challenges, find their self worth, unfold their innate talents and above all make them believe in their "unique self". "From tiny seeds grow mighty trees within the children, we plant tiny seeds each day, so that they grow into adults of strength while having their roots deep into the earth. We water them with hope, kindness and affection and feed them with nutrients of knowledge, dedication and character.

I hope with our tiny efforts we succeed in creating the desired positive and creative educational environment that supports and nurtures young and talented minds.

Soumya Dwivedi (Director)

About Present Education

Education has undergone a revolutionary change. Electronic gadgetry and cyber world has reached its meteoric height and speed. Spread of net and easy access to cell phone has opened up a global vista before every student. Now one single wrong conception, idea or word may land any one in troubled water. Teacher is no more a source of information and second hand knowledge. Today to become successful one has to gain expertise in modern cyber gadgetry along with an ocean of innovative and novel ideas. Unless one has something new or extraordinary the cat will simply jump out of the bag.

Keeping all these things in view we also have tried to be intune and conformity with present day education.

About us

However, a new light, a new sun is rising from the eastern horizon that beckons for a novel beginning. Though "VIDYA SANSKAR PUBLIC SCHOOL" now nascent, it promises to inculcate a knowledge that will produce an august personality mirroring the high and might India of yesterday, today and tomorrow to come. "VIDYA SANSKAR" as the name suggests is pledged to impart and infers **VIDYA** along with **SANSKAR**, our platonic platform on which the huge awe inspiring, prodigious Indian culture stands claiming the greatest esteem from the world.

We have tried and have been continuously trying to renovate, refurbish and restructure our ideas into concrete. Black board teaching along with smart class teaching has also been started and we have seven class rooms equipped with the electronic gadgetry for easy, better and recorded teaching along with feed back of the students. For security the entire structure of the school - inside as well as outside is under the strict vigilance of close circuit T.V.

A huge conference hall equipped with projector has also been constructed. This is a golden feather in the cap of the school. Since long there was a need of such a hall where from all the students can be addressed. For immediate necessity all the students can be gathered in a ziff. Along with sanskar we are adamant to instil morality among the students for which we run moral education classes regularly.

Labs

Without application and practical knowledge, theory becomes insipid, meaningless. We provide the students with Science labs (Physics, Chemistry, Biology) with all the essential instruments and equipments.

Computer Lab

This is not an exaggeration to say that the present age is less a "Kali Yug" more a "Computer Yug". The time is not far away when computer will be the soul of human civilization. Our computer lab is adequately equipped and our expert faculty is dedicated to bring the best of a child and make him a computer Wizard.

Maths Lab

As education expands, new conception and new facilities are indicated and introduced. Math Lab is a new concept to augment the interest in math among student through practical visualization of geometric constructions and theorems. They also learn to solve mathematical game, queer qualities of numbers and puzzles and reasoning.

Music

Music & Arts are most probably the greatest of the aesthetic human faculties since the dawn of the civilization. Music smooths lulls, comforts, inspires and energises. Music has the capacity to teleport human beings to the realms to divine bliss. Inspired by above, we try to unfold the budding petals whether it is instrumental, vocal or percussion.

Co-curricular Activities

Co-curricular Activities of a school reflect out the academic capabilities of a student. As education aims at over all personality development. Co-curricular activities play a major role in making and sharpening of a student.

Under this we conduct many things as dramatics, quiz, elocution, debate, fancy dress, mimicry and many more at school level as well as inter school level to bring out nurture and master the unexplored faculty in the students. Since the birth of school our student have brought many trophies and laurels in many different fields of Co-curricular activities.

Our Achievements

Our students have made a solid break through in CBSE X class examination where 11 students out of 69 have achieved 10CGPA. It is a matter of great pride for the school as well the nation that our students have been awarded by honourable president of India. It is a matter of great pride and honour again that our students have represented U.P. at National level in National Children's Science Congress.

Games & Sports Education

A big sparky play ground carpeted with lush green grass is there for the upcoming sport person. It is planned to provide with all possible equipment and courts associated with outdoor games. God willing we shall to be parental institution for producing National and International Players in future.

Besides, Yoga the time tested ages old recipe for good health and the union of body, mind and soul, has also been given priority. Students are given yoga teaching practically. Without a healthy body and a healthy mind how one can reach the epitome of success.

Scored 10 CGPA in Class 10th, 2017

Moral Education

Moral education has lost some where in the huge rush of modernization. Value of morality have become backdated, left over. But for us, it is the very blood that should flow in the veins of our youngsters. So we offer great emphasis on this too.

Scholarship

The school offers special Scholarship for talented students who top their class in overall academic and extra-curricular activities of the school. This special scholarship scheme applies also to the topper students of others schools who take admission in our school.

Our Efforts

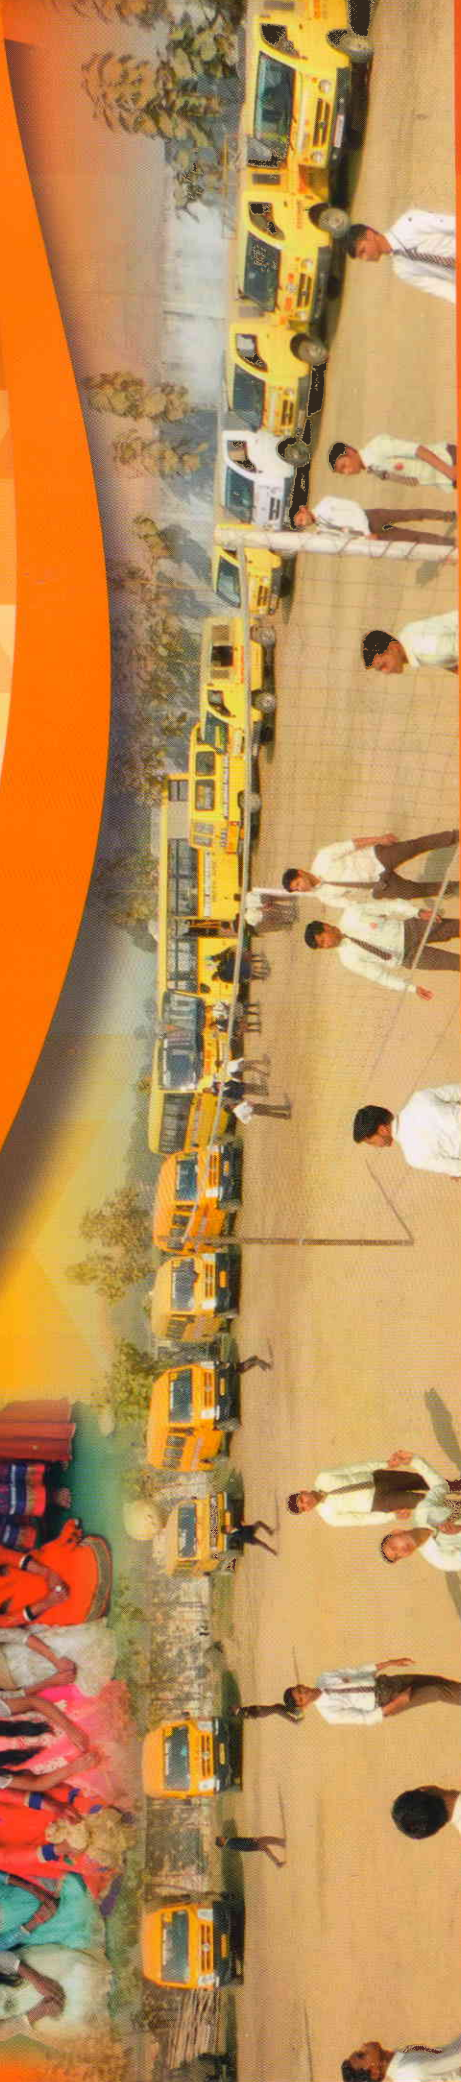

We are jointly and integretedly doing our level best to take our students to global panorama so that our school may one day become something better than that of Harrow and Eton. V.S.P.S. may one day become the hall mark of higher secondary education.

Future

We also plan to make it a residential school equipped with big and grand hostel for the students who wish to stay. The hostel will be well furnished with best of comforts and electronic gadgetry including computers and internet. Finally there are many more that will come from time to time.

However, "VIÐYA SANSKAR" is not only a school, it is also a new concept, a philosophy that has been forgotten by those who mint money from the noblest cause of civilization.
